What is Kiwisun like?

It is something more...

Within its perfect environment KiwiSun combines a wonderful spa experience and a healthy philosophy to life. It has an individual style that compliments this and makes this a unique and harmonious experience.

What are the benefits of franchising?

A franchise partner obtains an immediate reputation and level of authenticity. The aim of the franchise is to provide, utilising the vast experience and specialised knowledge of the owner of the system, a finished business concept for the investors. By joining the franchise partners will obtain special competitive market benefits through which they can instantly take advantage of great business conditions and profits. It is market proven that consumers trust a brand already known, with each unit being identical in image, price and service the brand will go from strength to strength with increasing consumer confidence..

Franchises are becoming increasingly popular and have now reached a vast number of consumer fields, from restaurants & cafes, to estate agents and beauty salons right through to industrial productions. Within all fields the benefits of joining a franchise are very clear, not only do you have a well known brand and with that consumer confidence but you also have the franchise support network. Often a new member can be helped with special financing conditions but more notably the continued support is focused on operational assistance, further development and business expansion.

One of the greatest benefits of the franchise system is that someone has already studied the systems and functions. As a partner you get to take advantage of this expertise by becoming involved in an already tried and tested operation. You have the opportunity to sell branded goods, and high quality services all under the protection of a registered name and trademark.

Of course, the system provides for its partners a lot of more over and above that, starting with market research through to nationwide advertisements with the added bonus of continuous training, all of which contributing to the overall success and continued growth of the franchise. And the growth of the individual partners is also in the interest of the whole franchise, as the whole network is interlinked as one succeeds so does the other.

Our company has 19 years of manufacturing experience. It launched its health conscious solarium system, the Kiwisun franchise network, in 2006. Our aim was to establish a tanning culture where we can serve a wide range of conscious users.

Thanks to our developments, our guests can enjoy the positive biological effects of tanning (beautiful auburn skin, natural vitamin D production, increased resistance, feeling of well-being) while their skin will not become burnt, red, wrinkled or dry and its moisture level will not decrease. The UV emission of our solarium devices does not exceed the value of 0.3 W/sqm.

What are the benefits of the KiwiSun franchise?

Since its introduction in 2006, the KiwiSun solarium network is enjoying unbelievable nationwide and international success, with it's current growth and expansion still going strong.

Kiwisun has a mature concept for opening solarium studios with the focus on its unique image, exceptional operation standards and innovative marketing. Highlighting these aspects allows the partners to run a well operated and guaranteed successful system.

The full design of your KiwiSun studio is carried out by qualified experts,

thus the development of your unit will not be more expensive than the price of an average unit. The design of the studios is based on a unified image manual, within which certain specifications must be adhered to. The design of each shop will be checked and approved by a KiwiSun representative in each case, and the work can be carried out by either the partner or this can be entrusted to KiwiSun to complete.

KiwiSun provides its partners with territorial coverage protection. By dividing countries and large cities into districts, KiwiSun promises that no other KiwiSun studio will be opened within an agreed area that could hinder a partner's business. A partner can choose to have exclusive rights to a district depending upon the services available at their studio. The KiwiSun solarium network is developing towards success along a pre determined, well visible business process.

This is the word of KiwiSun

Will you join us?

Benefits of the Franchise

- There is no need to launch new outlets as partners can adapt an existing system.
- Special knowledge and experience within this sector are not required.
- A refined concept is provided.
- There is no risk and no need to gain experience at your own expense.
- Initial training for staff.
- Central marketing.
- Exclusive coverage of geographical areas.
- Joint nationwide campaigns.
- A tried and tested system that benefits from years of expertise.
- Continual advantage to provide the latest up to date technology without the need to monitor the market changes for yourself.
- Guaranteed and permanently available background support, including equipment training, maintenance and replacement.
- Support from fellow partners.
- Increased consumer trust through expansion and brand awareness.
- Advantage of individual studio prosperity benefiting the entire franchise through brand success and brand recognition.

Infrasolarium

Prepares the skin for the healthy browning equal to the solar rays before using the solarium. Warms up the skin, expands the pores, so the browning becomes more successful and long-lasting. Now we can enjoy the well-known biological benefits of infra radiation in the solarium, as well. The infra radiation detoxicates, reduces weight, decreases cellulitis, increases power of resistance, bring up to full strength.

Our most recent development is the green bio-solarium which in addition to giving a gentle tan and skincare, thanks to its special frequency, also improves the well-being and has several beneficial biological effects.

Something different...
